

Compared between YYS machine and Rewinder

Cutting materials	YYS paper cutting machine	No requirements for paper roll material: 1. Not only can cut broken paper, such as soaked, wormed, but also can use this machine to cut the much bigger width into small rolls; 2. It can cut all kinds of paper, from low grammage tissue paper to high grammage cardboard;
	Rewinder	1. the bubble water paper, paper of the end of the paper and broken cannot achieve rewinding; 2. low gram material with poor paper rewinding paper brittle;
Cutting time	YYS paper cutting machine	It'll take 5min to cut 1.5m DIA and 250g Kraft card board, time consuming conversely to weight.
	Rewinder	Have strict requirement of Paper roll material and gram weight, soft paper rolls cannot fast rewinding with high speed.
Wastage	YYS paper cutting machine	Due to the thickness of the machine's knife, Our paper cutting machine existence 1 cm loss of paper roll width;
	Rewinder	1. If rewinding high-grade paper rolls, will no waste; 2. If rewinding paper rolls which from paper making line, both sides need to trimming, The actual loss will depend on operating personnel professional level;
Price	YYS paper cutting machine	According to different models and configuration, the machine's price will different. Take YYS - I model as example, the priced range of 180000RMB to 300000RMB;
	Rewinder	According to rewinding material and speed, the machine's price will different. Take 1000 m/min speed rewinder as an example, the price is about 500000 RMB;
Installation and use	YYS paper cutting machine	YYS machine don't have special requirements about use environment, Place on level ground, will fully adjust allowed. according to the video and installation instructions can be installed by yourself. At the same time, only need one staff to operation.
	Rewinder	Rewinding machine installation are complex, needs to have the foundation, must be installed by professional people. installation and debugging 's cost is high, At the same time, High technical level requirements to operators.
